25X1A

25X1A [] called to say that at the Staff Meeting this morning, Wheelon again expressed interest in [] and how it was going 25X1A to be done; i. e., should the operation be from [] I have 25X1A asked [] to get with you to lay out a complete plan for this work which is consistent with the [] operation. If 25X1A you don't hear from Bob in a day or two you might take the initiative. I don't think we have any preferences whatsoever on which station should be used. The selection should reflect their operations more than ours, I believe.
